

# Welcoming families to our Open Morning 2016

## Celebrating our Foundation Stage

We believe that high quality Early Years ensures that our children develop a love of learning in an enriching, purposeful and child-centred environment.

We listen to our children and follow their individual learning journeys in order to shape the direction of the Early Years curriculum. Our children help to plan the curriculum to ensure that it is reactive to their interests, as well as matching it to their stage of development.

We believe that the learning environment should be beautiful and a space deserving of the children's creativity. If the environment is beautiful, children are enabled to respect it. The environment is shaped by the children. Through observation, it is developed in response to children's actions and words.
